Overview

Mr. Hurt Head Trauma Trainer is cast from an actual victim of a road accident and presents students with a variety of trauma conditions. Comes mounted to a base but can be easily transferred to adult manikins for use in full-body trauma scenarios.

Recognition and assessment of the following:

- Palpable fractures
 - Open depressed skull fracture
 - Le Fort I & III
 - Nasal fracture
 - Mandibular fracture (left)
 - Fracture of C-6 vertebra
- Unequal pupils
- Hemotympanum

Anatomically accurate human skull reproduction renders simulator radiopaque for added realism.
